STRATEGIC PLANNING MUNICIPAL

Why do the strategic planning?

Brazil in the long history of its experienced a complex process of reform in its administrative structure, governed in accordance with the principles of the governments installed. The Brazilian municipalities have the same paths of the country, and now the mercy of a policy more centralizing, now gaining a little more autonomy with the local issues. The Federal Constitution of 1988 consolidated municipal autonomy and established so rigid the powers of loved Federated, increasing significantly the powers of Brazilian municipalities.

The current time municipal presents some realities to consider. The first the need to establish a new paradigm public management, Modernizing the machine state, through the alignment of IT resources and training of servers, With looking to the organizational effectiveness of the State.

A second comment linked to this new idea management refers to the recovery of cities as a pole of development and extraction of positive experiences.

Hence the strategic planning to assist the Manager urban, aiming at the integration of synergic municipal actions with the various stakeholders involved in the process, in particular the strategies set out by the public.

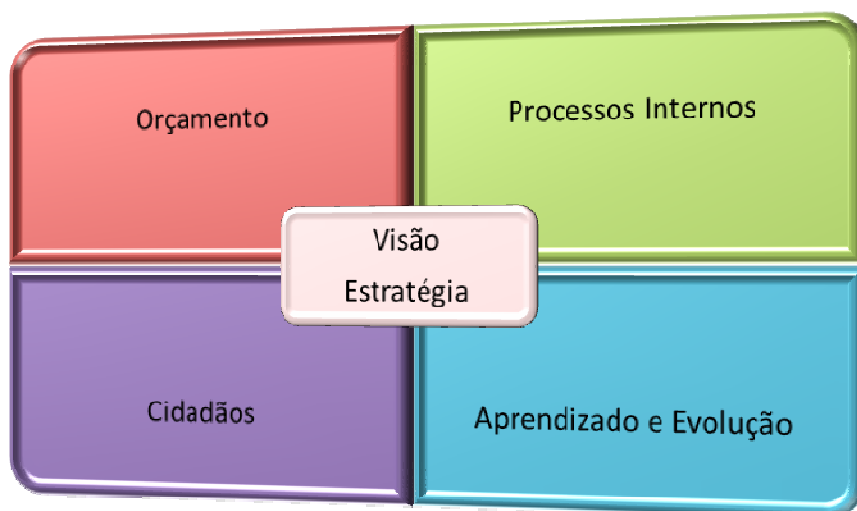

However, to legitimize the strategic planning municipal, their actions are not authorized by the legal system, become the inapplicable project merely illegality.

The strategic planning municipal tool is very important for the urban Manager, which enables the machine state make more efficient, taking advantage of technology for managing information technology management in public and private management of these
